

## Flightpro the one stop booking engine!

Display and book fares from different sources.

Flightpro is a multi source booking engine that can be easily customized and used as white label on any web site. It is a multi-GDS/CRS booking engine (Amadeus, Sabre, Travelport, FareLogix, Lowcost carrier CRS, Charter content in direct connect) and it is offered as SaaS (Software As a Service). The engine is provided with 2 very customizable versions of web front-end: Flights3 and the full responsive design Flights4.

The next generation Flights 4 engine is implemented in python and fully utilizes our XML API services as pure presentation layer.

The engine also aggregates various content from specific OTA, agencies or consolidators based on their contracted net fares and GDS office ID or PCC content, all bookings remain property and are channeled to the agency or consolidator GDS of choice.

The tool is also multi lingual and multi currency and can be fully customized to the look and feel of the agency.

One of the main advantage of Ypsilon Flightpro is its extremely short implementation time frame.

Ypsilon Flightpro can be implemented within a day enabling immediate e-commerce presence.

Mark-ups can be easily calculated through the Powerpricer mark up module on all fare type to enable agencies to generate profit on every sold flight.

## Main features

- ✓ Full Responsive design
- ✓ Consolidator Net fares
- ✓ Consolidator Nego/corporate/unifares/ITX fares
- ✓ Independence from single GDS
- ✓ Available as consolidator B2C white label or connected to own PCC or Office ID

## Vertical Integration of IT Solutions for the Travel Industry

The travel industry requires more than ever fully integrated solutions as opposed to patchworks of hard to maintain incompatible software.

Ypsilon provides end-to-end IT solutions for the travel industry ranging from fare management, multi GDS B2B/B2C booking engines and XML API, lowcost carrier content, hotel and car engines, ticketing robots, mid-and backoffice systems, tour-operator modules, cache data in diverse formats (EDF/OTDS/CSV), PCI DSS solutions, fraud prevention systems and payment solutions.

Our goal is to provide our customers with a complete turnkey solution to meet their specific needs at a highly competitive price.
