Access thousands of properties through our standalone Hotel booking engine or merge hotel content with flights!

Hotel content from different sources can be booked in through our standalone Hotel booking engine or merged with low-cost carrier, consolidator net or nego fares as well as published fares or charter flights in our flight booking engine. (Flightpro or Agentweb)
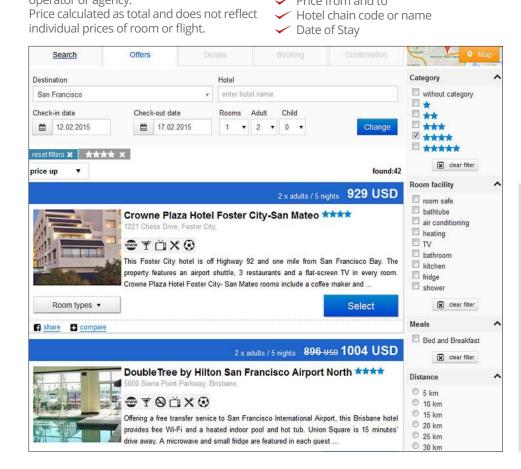

The hotel content is captured via XML from diverse suppliers.

Price calculation can be marked up by tour operator or agency.

Price calculated as total and does not reflect individual prices of room or flight.

Operators fares can be mixed with hotel fares and remain fully invisible.

Seamless real time booking of both flights and hotel room.

Full description of hotel and room.

Googlemap enabled.

Fully PCI DSS compliant.

Mark-ups can be defined based on several criteria as service charge or included:
- Country
- Supplier
- Amount
- City
- Hotel code
- Hotel name
- Price from and to
- Hotel chain code or name
- Date of Stay

Vertical Integration of IT Solutions for the Travel Industry

The travel industry requires more than ever fully integrated solutions as opposed to patchworks of hard to maintain incompatible software.

Ypsilon provides end-to-end IT solutions for the travel industry ranging from fare management, multi GDS B2B/B2C booking engines and XML API, lowcost carrier content, hotel and car engines, ticketing robots, mid- and backoffice systems, tour-operator modules, cache data in diverse formats (EDF/OTDS/CSV), PCI DSS solutions, fraud prevention systems and payment solutions.

Our goal is to provide our customers with a complete turnkey solution to meet their specific needs at a highly competitive price.
